01

Voice AI service advisor

Books oil changes to diagnostics — direct into your SMS.

THE PLAY

Customers call, describe the symptom, and the agent books the right appointment slot with the right tech, adds vehicle history, and texts the customer a confirmation with a loaner option. Confirmations send via Gmail, Slack pings the service manager on diagnostics, and QuickBooks Online keeps the ticket value visible in real time.

OUTCOME

Service drive booked solid, no schedulers needed.

02

Estimate & status chatbot

Photo in, ballpark out. Then live job status.

THE PLAY

Customers upload a photo of the damage or warning light, get an honest estimate range, and after drop-off can text the bot anytime for live status updates from the shop management system. Estimates archive in Google Workspace, Mailchimp sends the post-visit follow-up, and Canva builds the social-proof clips from happy reviews.

03

Local SEO for every service line

Brake repair, transmission, EV service — own each search.

THE PLAY

We build a landing page for every service and make-model combo you handle, push AutoService schema, and tune your Google Business Profile so you rank above the dealership in the map pack. Google Maps stays perfectly synced, Canva renders every service-line hero, and Trello tracks the content pipeline.

THE PLAY

A friendly face explains every repair recommendation.

THE PLAY

Your top advisor's avatar records personalized videos for each repair order — explaining why the brake pads are at 3mm, with photos from the lift. Customers approve more work because they understand it. Videos send through Gmail, queue inside HubSpot follow-up sequences, and surface in Square checkout when the customer pays.
